

Ing. Brizio Basi & C.

ASSOLOMBARDA
Confindustria Milano Monza e Brianza
Automotive Network

Ing. Brizio Basi is an Italian industry born in 1930.

Around the 1970 following the FIAT request, we start to produce vacuum degassing and filling systems, for the fluids and gases used into the vehicles.

Our high-tech systems are useful for improving safety and performance.

Brizio Basi uses European primary quality components, electronics and software are SIEMENS.

Some examples of our systems:

- Central processing and recovery for brake fluid, liquid cooling, oils, fuels, etc.
- Degassing the braking fluid and vacuum filling the circuit.
- Vacuum filling the engine cooling liquid.
- Hydraulic oil filling into the pneumatic cylinders, into the engine and transmission.
- Low and high bench pressure for gasoline.
