

Who we are

Telecare H24 provides Teleassistance, Telemonitoring and Telemedicine services and customized solutions to both private and public sector.

Telecare H24 analyzes its client's requirements and delivers the best in class solution to remotely manage patients

At the core of our solutions is a 24/7 service based on a Cloud Software backed by a Health Monitoring Center. The service enables the remote deployment, management & monitoring of vital sign monitors and medication dispensers.

Product description

1. Medical Devices are installed at patient's home. The medical devices constantly communicate with our **Cloud Portal**

A 24/7 dedicated **Health Monitoring Center** follows up all incoming alarms and performs a scheduled weekly call with a structured psycho-physical analysis of patients.

2. Often patients forget to take prescribed medications, take wrong doses or even wrong pills. In order to offset the problem of **therapy adherence** Telecare H24 has developed a specific service solution

3. Geofencing Alzheimer, innovative solution to localize patients in and out building.
