

Golan Plastic Products is a world-leader in providing comprehensive solutions for the transportation of hot, corrosive or abrasive liquid materials of every kind. Golan is the *only* worldwide manufacturer specializing in large-diameter cross-linked polyethylene pipe systems, providing industry and mining sectors throughout the world with **the most cost-effective, long-term solutions in the industry.**

Established in 1964, GPP today is a **global company** listed on the Tel Aviv Stock Exchange, with **more than \$60-million in annual revenues.** Our leading brand-name and international reputation is based on international standards in more than 40 nations, and a decades-long proven track record with long-term clients in dozens of countries around the world. GPP utilizes **the most up-to-date technologies to provide solutions for a wide range of clients** including the mining, dredging, chemical, manufacturing, and construction industries. GPP also provides solutions for municipalities' water infrastructure systems, worldwide.

GPP's unique product advantages over HDPE and steel pipe alternatives include high temperature and pressure resistance of up to 110°C; high abrasion and corrosion resistance; quick and easy transport and installation; the lowest ongoing maintenance costs, and an unprecedented life-span for all our pipes and systems

Golan provides not only products, but services and expertise, through planning, technical, engineering, and on-site support to our clients. We invite you to contact us for a **preliminary on-site consultation and analysis by our professional staff** of your company or municipality's requirements and challenges, so that we can provide you with the **customized recommendations and solutions** that have made Golan Plastic Products a global leader for almost 50 years.
