

# aerocom

*il Vs. partner per la posta pneumatica*

## aerocom GCT Srl

ASSOLOMBARDA

Filiera Automotive

### Who we are

With a German HQ, aerocom in Italy was founded in 1983 and immediately conquered part of the market in the field of pneumatic conveying systems.

More than 1000 aerocom systems are currently operating in our country, in many different realities (offices, logistic warehouses, cinemas, refineries, steelworks, hospitals, supermarkets, petrol stations, banks, motorway toll booths, public administration offices, hotels, pharmacies, etc.).

Our proven experience has made aerocom the reference pneumatic tube manufacturer at a global level, recognized in every sector.

### What we do

We create customized solutions for our customers in terms of both piping passages and technology: our range extends from fast, efficient and low-maintenance manual systems to fully automatic systems with intuitive interfaces that can be controlled remotely and reduce production downtime to zero.
