Air Liquide Italia S.p.A.
Leader mondiale dei gas, delle tecnologie e dei servizi per l’Industria e la Sanità

Who we are
The world leader in gases, technologies and services for Industry and Health, Air Liquide is present in 80 countries with approximately 65,000 employees and serves more than 3.5 million customers and patients. Oxygen, nitrogen and hydrogen are essential small molecules for life, matter and energy. They embody Air Liquide’s scientific territory and have been at the core of the company’s activities since its creation in 1902.

Air Liquide’s ambition is to lead its industry, deliver long term performance and contribute to sustainability. The company’s customer-centric transformation strategy aims at profitable growth over the long term. It relies on operational excellence, selective investments, open innovation and a network organization implemented by the Group worldwide. Through the commitment and inventiveness of its people, Air Liquide leverages energy and environment transition, changes in healthcare and digitization, and delivers greater value to all its stakeholders.

Product description
Air Liquide aims to deliver innovative gas solutions and technologies to customers, driving their performance and helping them reduce their environmental impact. Its customers range from the large company (steel, energy, chemical and petrochemical sectors) to the craftsman served through gas and services for their production processes (metals, glass, food processing, laboratories ...). Air Liquide also provides medical gases and services for hospitals and patients at home.

Oil & Gas
Air Liquide is a long-term partner that values operational excellence and recognizes the importance of delivering the reliability demanded by the oil and gas industry at every step in the value chain. Likewise, our integrated capabilities contribute to the success of our customers at all stages of oil and gas production, from exploration to refining.
Our gas solutions help customers increase recovery rates of existing fossil fuel reserves, explore unconventional sources of energy, process their products safely and produce cleaner fuels.
