Who we are

F.I.U.M. – Fabbrica Italiana Utensileria Meccanica is a company established in 1919 and it has always been committed to the production of threading tools, especially taps and dies. Over to the manufacture of standard products, the company has moved its activity during last fifteen years on special and out of standard stock production to satisfy increasingly heterogeneous requests.

More, F.I.U.M. is the exclusive agent for the Italian market for the French company Magafor, one of the world leaders in the production of cutting tools since 1937 and specialist on micro-tooling and combined tools.
