

## Fourstem

A partner that moves with you:  
our experience for your supply chain

## WHO WE ARE

Fourstem is a supply chain consultancy with the capacity to interact with various realities that, due to high complexities of their production processes and logistics management, need a partner which is able to personalize all the services: from the more operations functions to the movement of goods to invoicing and reporting

The request of more global services and the increase in the volume of goods moved make the management of all shipments a challenge, increasing costs and decreasing the quality of the supply chain process.

Our services offered:

- 4PL (Control Tower)
- Supply Chain Data Analytics
- Integrated supply chain projects
- Transportation Management System
- E-BID per Spot Quote
