Oerlikon Balzers Coating Italy S.p.A.

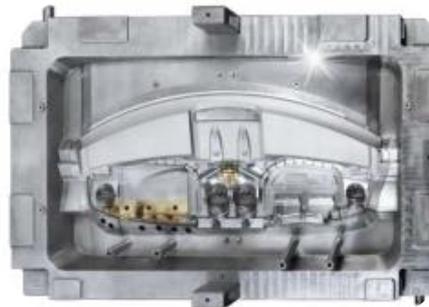

Oerlikon: creating innovative industrial solutions for a better life

ASSOLOMBARDA

Filiera Automotive

Oerlikon Balzers Coating Italy is the Italian branch of the world-leading provider of surface technologies that significantly improve the performance and durability of tools for the metal and plastic processing industry as well as precision components. Extremely thin and exceptionally hard coatings, our portfolio reduce friction and wear, enabling sustainable industry and low-C footprint.

BALINIT and BALIQ brand names market coatings used in several applications, including tools for machining Automotive components, molds for metal sheet panels forming or for plastic injection or Al die casting processing. Specifically, the Carbon based coatings can be used in several Auto application, to reduce friction and emissions, then: piston pins, injection components, gears, etc.
