

### Who we are

SCF was originated by the merge of competences of SAES®, the world-leader advanced materials company, and Metalvuoto, a well-established player in the advanced packaging sector. As a global player in the sustainable packaging market, SCF designs and produces coated films capable of better performances compared to classic technologies in the food, healthcare, and personal care markets.

### Product description

#### Eco-friendly product family

High-barrier films that reduce the number of layers and the thickness of packaging, enabling fully recyclable single-material structures.

#### Compostable product family

Compostable films treated with barrier or active coatings for a fully sustainable packaging.

#### Active product family

Patented films unequalled in reducing food waste and maintaining freshness in products prone to rapid deterioration
