Agroalimentare Network

SOLANA S.p.A. is an high tech tomato factory with a capacity of about 200.000 tons of fresh tomato per year with a processing capacity of about 3.500 tons per day. SOLANA started manufacturing in 2003. It has been designed in order to optimize the hygiene and the process control system. The advanced technologies and the layout of the production lines together with the higher standards of processed raw materials, make it possible to achieve the best quality to satisfy the most demanding markets. SOLANA S.p.A. entered in 2011 the food service market with new products obtained with innovative technologies as ohmic pasteurization and aseptic cold filling. As a result, a new quality standard for premium category has been achieved.

SOLANA S.p.A., is an ideal partner in tomato business.

SOLANA only processes Italian fresh tomatoes from integrated farming and employs the best technologies to preserve quality and freshness.
