Cross Connected® HoloDeck

Increasing efficiency in manufacturing using Virtual Reality

Complexity in industrial production....

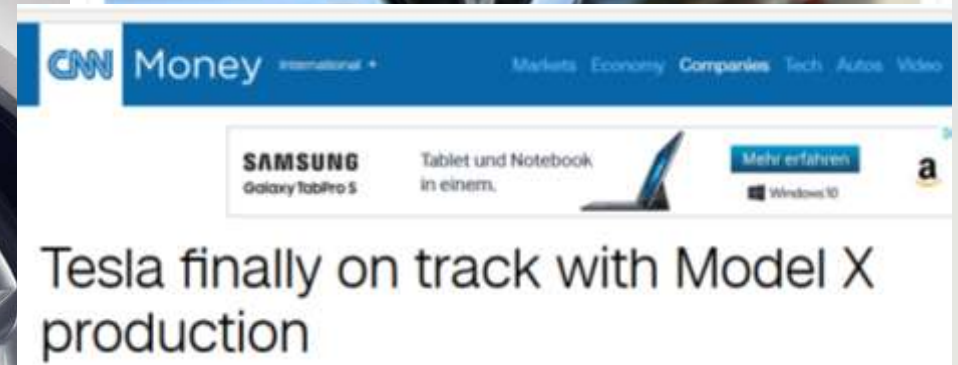

75 % external added value

*source: VDA 2016

... still leads to tremendous problems

Production Planning 2016

**Status Quo: No possibility of integrating people
into digital working process**

Rüdenauer 3D Technology GmbH

X HoloDeck

Cross Connected® HoloDeck: USPs

Global collaboration

Virtual Reality UX

Cable-free
Walk-through

VR Streaming

Visualization of
production processes

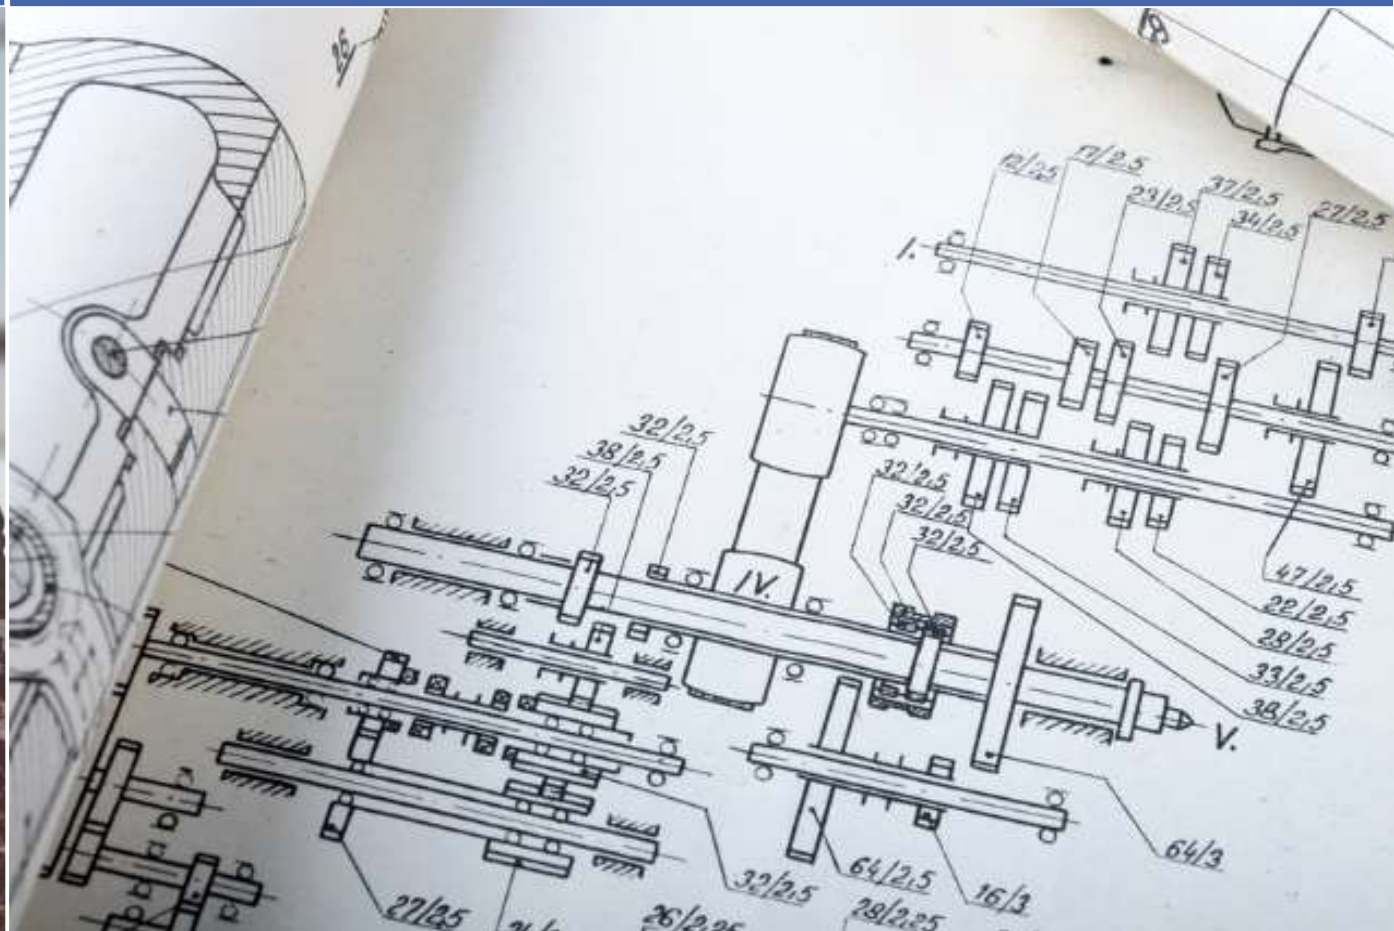

Business / Eng. Data Integration

Collaborative review of digital products

Speeding up design & development

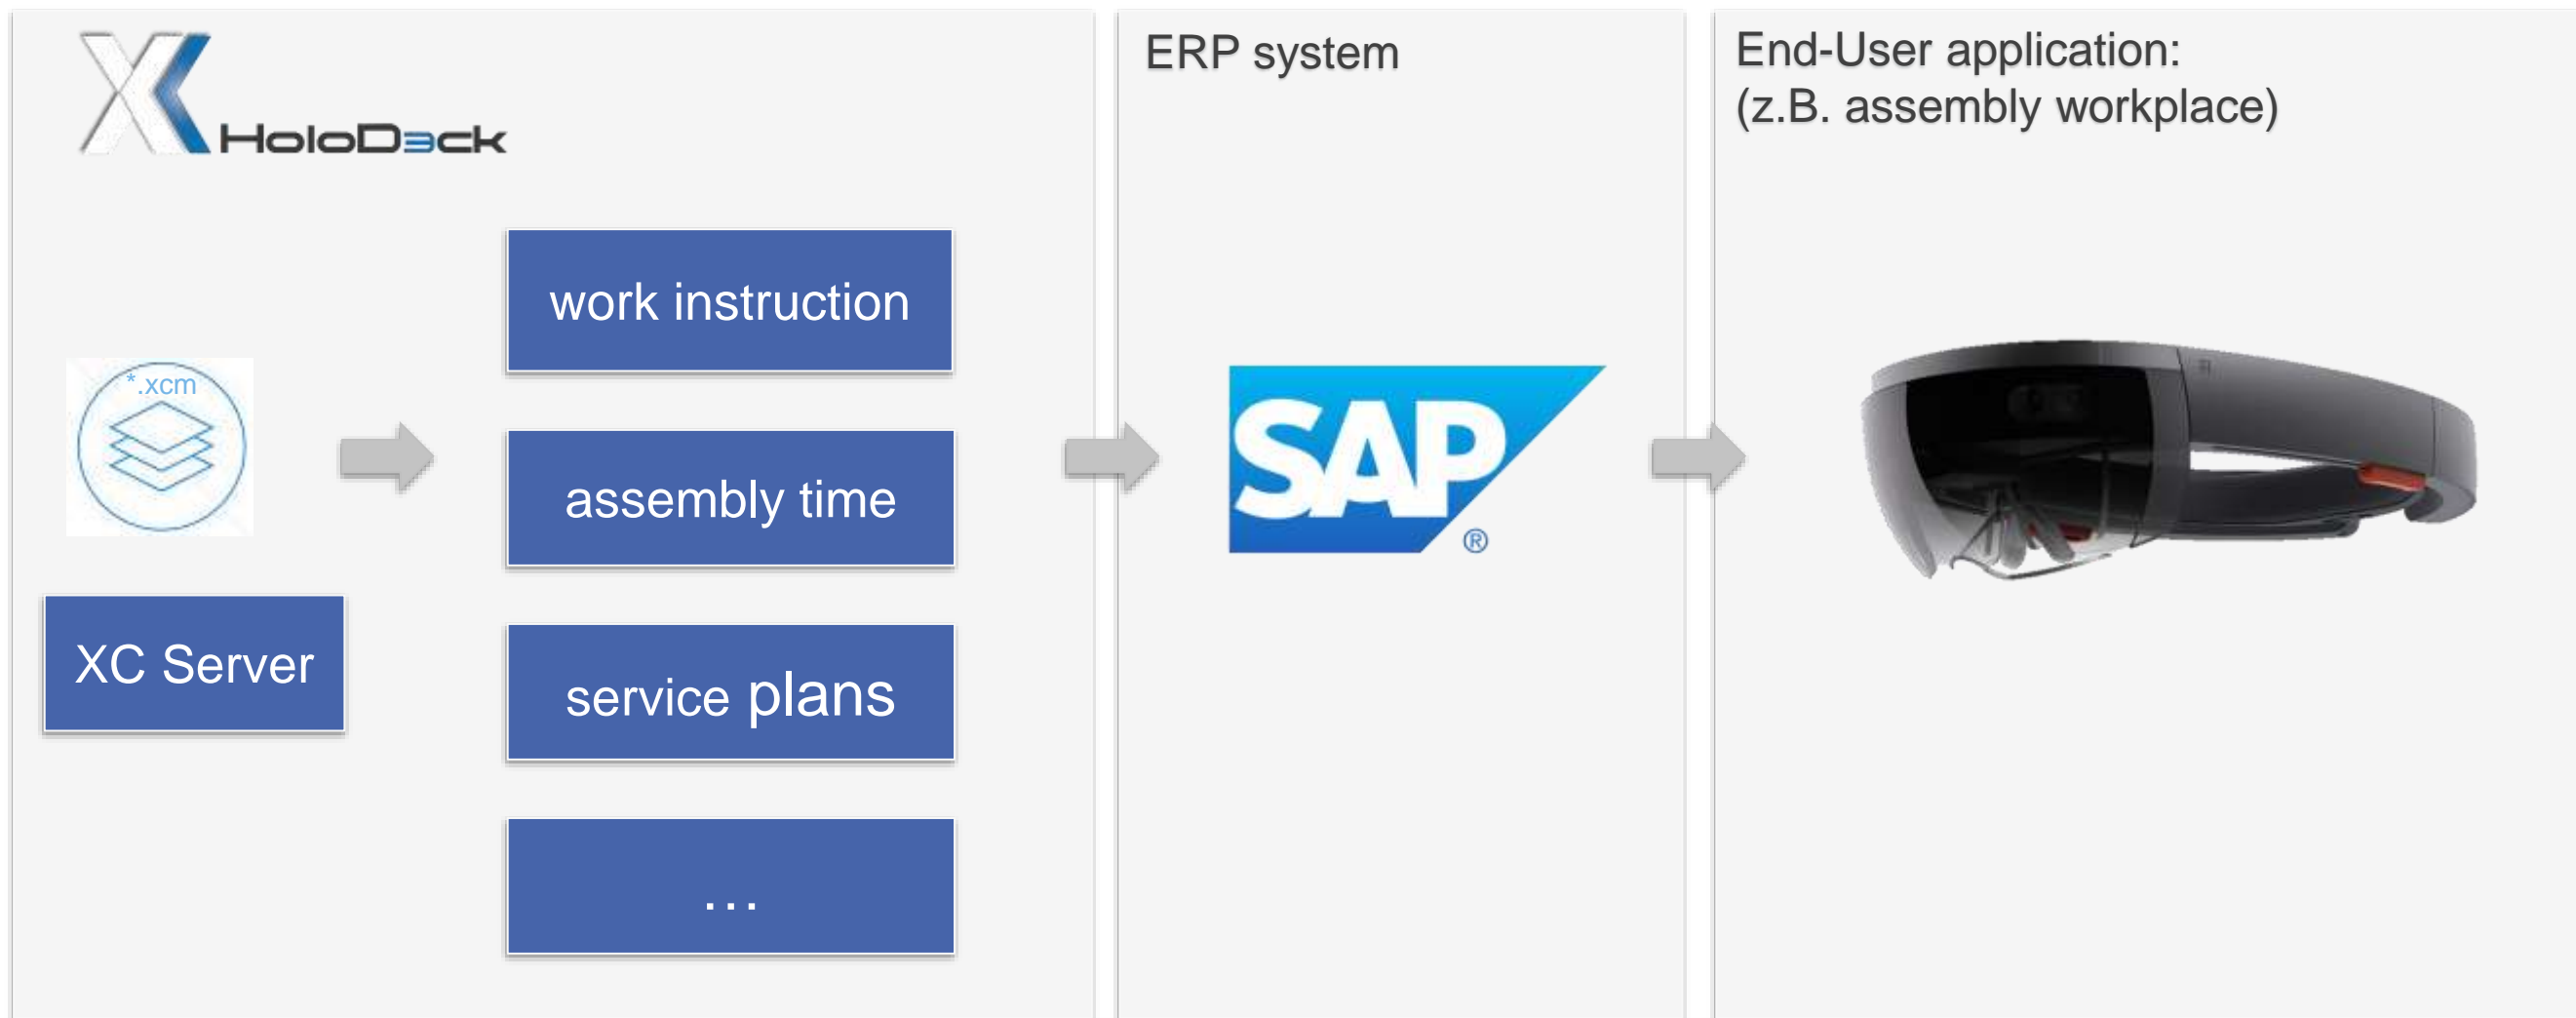

Accelerating commissioning

Standardization of workflows

Our objective: Continuous digital process chain

We offer

- improved production cycles
- less errors in manufacturing
- shorter time-to-market through efficient planning process from product design to manufacturing
- operational excellence through digitalization in manufacturing planning and operation

**And seek
Innovative manufacturing companies**

We are looking forward to hearing from you!
