01

Expo 2030 Riyadh Overview

Foresight for Tomorrow: the compass at the heart of Expo 2030 Riyadh.

A **critical skill** & an **urgent practice** for the 21st century to prepare, adapt, and innovate in a complex and fast-changing world.

Expo 2030 also embraces foresight as method and a mindset: a way of seeing the world as a journey through a landscape of possible routes and destinations.

Foresight for
Tomorrow

Expo 2030 Riyadh invites nations and citizens into the world's most ambitious collective exploration of the future

The Foresight Sub Themes

Each subtheme reflects different foresight focus, yet none stands alone. Just as the paths blend, overlap, and diverge, the forces shaping the future are interconnected.

Technological breakthroughs reshape society; cultural values guide innovation; planetary boundaries influence economic choices; and collaboration turns ideas into shared outcomes.

Foresight gains its strength from understanding these relationships

Technology

Transformational Technology

How do we use foresight to ensure technologies serve humanity and the planet?

Planet

Sustainable Solutions

How do we use foresight for our communities to thrive within the earth's limits

Humanity

Prosperous People

How do we develop a culture of wisdom across generations for human flourishing?

Culture

World Wisdom

How do we enrich foresight through heritage and cultural wisdom?

Collaboration

Collaborative Communities

How do we accelerate foresight through global collaboration?

Theme Engagement

Deeply Saudi and Globally Inclusive

We are in the process of launching a series of about 20 theme expert sessions to refine the subtheme areas to ensure foresight integration and global resonance.

Participant-first Approach

Ensuring global representation & relevance

Visitor-first Approach

Foresight-driven experience, including scenario-focused storytelling

Expo 2030 Theme Initiatives

Informing thematic features and content areas, including theme pavilions, thematic forums and best practices.
